

Securing the best care possible through Cyber Security at Icon

The work of the Icon Group Cyber Security Team is quite complex – seeing them continuously monitoring and responding to ever-evolving threats and helping ensure our patient and partner data is always safe. These investigations are critical and often require the collaboration of multiple teams across Icon Group to ensure an appropriate response.

9 dedicated cyber security experts, supported by a Security Operations Centre

24/7 operations to monitor and protect our data

8.5B+ events are monitored each month

175,000 suspicious detections are detected from these events

2,300 alerts are created each month from these suspicious detections

90% of these alerts will be worked on, prioritised based on risk and impact

35 investigations will be generated from these alerts each month
